Law Enforcement Software Made Easy

About LawSoft, Inc.

LawSoft, Inc. was formed in 2002, however the basic guiding principals of an easy and effective system was a concept and practice put into use back in 1995 by a software developer turned Police Officer at the direction of his Department. Essentially the system was created out of the necessity for a record management system that was conceived not only from a police officer's perspective, but by a police officer that used the system day in and day out. The outcome was a system that was predicated on "Ease of Use" to ensure that Officers would be able to easily capture information and produce professional reports without navigating through cumbersome, time consuming procedures just to write a report. What has evolved is a seamless and streamlined

solution that allows the flow of information to instantly populate all of your reports, thus eliminating redundant data entry. Retrieving information is just as easy. Once reports are created you can take advantage of the Case Management feature that will allow you see all the reports created under a particular case number. Auto Redacting makes OPRA requests a snap and court preparation takes seconds. With a built in secure email feature sending reports other agencies is a snap. Our Computer Aided Dispatch allows Dispatchers to easily track Officer's locations and availability status as well as advise them of critical information related to that location. With over 100 clients statewide our clients all experience unsurpassed support.

Secure Information:

- ♦ Secure remote connections via 2048 SSL encryption
- ♦ Granular security scheme determined by departmental policy, rank, time limits and report type
- ♦ Access to system controlled via Active Directory
- ♦ Encrypted & secure off-site cloud backups to foil Ransomware attacks

Professional Reports:

- ♦ Professional easy to read Police Reports
- ♦ State, County and Local forms included
- ♦ CJP prepared report uploads
- ♦ UCR Summary & NIBRS reports supported
- ♦ Online NJTR-1 submissions
- ♦ Statistical Data GIS Mapping
- ♦ Integration with other systems
- ♦ NJCOP Accreditation approved

- ♦ Real Time access to data
- ♦ Instant Master Name Inquires
- ♦ Reports completed on scene
- ♦ Data Conversions
- ♦ Dashboard / CompStat Reports

Mobile Solution

LawSoft CAD / RMS can be deployed on your mobile data computers and provide officers with real time access the entire LawSoft system via our fast, reliable and secure remote application. Officers will enjoy having instant access to information as it is entered into the system. Master Name and Location Inquiries along with full report writing is supported on the remote application as well. Our custom "iLawSoft" iPhone / Android application allows access from anywhere that has a WIFI or Wireless connection.

We make reporting easy, efficient and effective...

♦ **LawSoft CAD/RMS comprehensive database program effectively generates reports and retrieves data at the touch of a button. LawSoft is a client/server network solution, which runs on Windows 7 Pro, Windows 10 Pro, Win Server 2012R2 / 2016 / 2019 and MAC platforms!**

♦ **The CAD (Computer Aided Dispatch Module) allows you to track Officer's locations as well as their availability status. Integrated DMV access provides easy entry of persons and vehicles. The system has the ability for dispatch to advise of critical information related to that address such as address history, TRO's, Firearms on scene, address alerts, etc...**

♦ **Fire & EMS CAD available.**

♦ **Integrated AVL and CAD mapping makes dispatching more effective and easier then ever with recommended unit choices based on closest proximity to the call.**

♦ **RMS (Record Management System) features include CAD information, Investigations, Arrests, Property, DV Offense Reports, NJ Crash Reports, Integrated Mugshots, Integrated Livescan, BEAST evidence interface, digital media and many more.**

♦ **Automatic redaction for OPRA requests and electronic NJ Crash Report submissions. Case related reports can be found in less than a second for easy retrieval for CJP case preparation for your Prosecutor's Office online RMS portal. Keyword searches based on any data entered.**

♦ **Officers will take advantage of the one-time information capturing feature. Once any information is entered into the system it will populate in any future reports, thus eliminating redundant entering of information. All information is cross-referenced between reports.**

♦ **LawSoft CAD/RMS will greatly improve record keeping efficiency, accuracy and security while easily generating monthly statistical reports and generating NJ State UCR Summary & NIBRS Reports in seconds.**

♦ **LawSoft CAD/RMS can be custom tailored to your department's needs and fully implemented in a short amount of time including data conversion.**

♦ **Remote connections encrypted via 2048 bit SSL (Secure Sockets Layer) and data file size is virtually limitless without affecting performance.**

♦ **Early Waning System & Internal Affairs system included.**

♦ **Meets NJCOP accreditation standards for New Jersey.**
